

Appendix D: Baseline human labour cost inputs

This appendix reports the baseline human labour cost inputs used in the economic analysis. The table combines the wage estimates reported in Appendix A with the sorting productivity and quality parameters reported in Appendix B. These inputs determine the annual employer labour cost, annual processed volume and human sorting cost per parcel for SF Express and JD Logistics.

Table D1: Baseline human labour cost inputs

Input	SF Express	JD Logistics
Average monthly wage (USD)	948.33	1,000.49
Annual employer labour cost (USD/FTE/year)	14,794.00	15,628.79
Human sorting throughput (parcels/hour)	500	400
Quality adjusted annual throughput (parcels/FTE/year)	975,834	743,493
Human sorting cost (USD/parcel)	0.01516	0.02102
